“ONE SIZE DOES NOT FIT ALL”

Your business is unique. T2M partners with you for planning, deployment and daily operations tailored to your needs. We do migrations every day and manage each one for a superior outcome for you. T2M Managed Works delivers world-class experiences – **PROFESSIONAL SERVICES** and **COMPLIANCE SERVICES.**

Experience Matters

Professional Services

Award winning Engineering services designed to support the planning, design and deployment of Microsoft Teams. A staff of Microsoft MVPs and industry recognized engineers with years of telecom experience creates the T2M difference. The result is Microsoft awarding T2M the highest level of certifications available.

Calling for Teams Advanced Specialization

Services for everything Teams

Network Health Pre-Check

Network quality is critical. Getting it right isn't easy. T2M will optimize your network for all things Teams and position you for a day one successful rollout.

Tenant Configuration

Don't just flip the switch (what a mess) or take the Teams default settings. Deliver an outstanding user experience and realize increased adoption. Learn from our best practices.

Migration Planning

Use proven process to establish business & technical functional requirements. Clearly define stakeholder expectations and establish real-world user profiles for your enterprise.

Tier 2+ Incident Escalation

Give your service desk an "easy button" when it comes to any kind of Teams issue. T2M covers Voice, Chat, Meetings, Collaboration, and Automation all in the same service. No more wondering where to go for answers.

Get a professional Microsoft MSP... and unlock real Teams value.

Manage Risk

Compliance Services

Compliance Consulting will help you maximize your value from the O365 compliance tools you're already licensed for. Let T2M help you secure your information and ensure you're protected into the future. Protect your investment in Teams and enable world-class collaboration without raising your risk profile.

T2M Compliance Services help minimize unnecessary exposure. Take control of your O365 data with reporting and monitoring. Identify suspicious activity from flagged files, take action when users violate your policies and get notified in real-time of exposed private/corporate information transmissions. Manage the risk and avoid surprises.

External Sharing Report

Which domains do you share data with most frequently? Covered by NDA? Protect information and close external leaks.

Retention Policy Configuration

How much confusion is introduced with duplicate Teams that should be consolidated? What is the real cost of searching multiple Teams for documents?

Could you pass a Compliance Audit?

Compliance controls with Microsoft can be complex and confusing to get right. Given the risk involved in failing a compliance audit, this is not something you can afford to get wrong. Don't be left on your own to answer a compliance question or issue..

Abandoned Guest Users Report

How many people from outside have been added to your environment and no longer need access? Clean house and limit exposure.

Usage Summary Report

How are people using Teams? High collaboration modalities like meetings or just as a fancy chat tool? Drive adoption, encourage collaboration, and increase productivity with usage insights.

Control your Teams exposure with T2M.
